

Strengthening Our Cities: Mayors Responding to Global Climate Change

Green Meeting Report Card

Purchased 169 Denali Green Tags to offset the 236,600 pounds of carbon emissions, which covers 100% of the global warming pollution generated from the meeting. By purchasing Green Tags, we also help increase demand for renewable energy products.

Used recycled products for event materials: paper is post-consumer recycled waste, name badges are made from scrap metal, folders and CD cases are recycled chipboard.

Partnered with Green Star to ensure recycling throughout the meeting.

Posted meeting materials and presentations on meeting website instead using printed materials.

Purchased fully compostable plates, silverware, napkins, cups, and even the trash bags from Rare Earth to help achieve our goal of a zero waste meeting
